Like Edm: "How STOP came to ignore fear."

But my aim is different:

How to change this.

MGE-DE

I was not really — I did not want to —
and in a proposal last month (for a book)
as Amey + MGE agreed —

Now do I want to complete a proposal
in next 2 weeks, perhaps even in next 4-8 weeks;

But I will start now.

(MGE asked: Will you be more
really after working on book for 1-3 months?)

(I disagree, still, with MGE's belief that
I will not start writing substantial programs
in book without a publisher's deadline

I agree that I need a deadline to
finish the book

(but suppose I could only get 3 months,
or even one year...)

His estimates are reasonably good on
observing, leaving on part (I want) observation.

But I know for sure, by an
exact commitment

and the difference between my focus now
and one best year(s) (since \$2004)

3-9-9 MGE-DE on book

1. I'll start work on proposal (not, "book")
right now.
along with reading.

(Earlier, I told him: If not substantiated progress
by June 9, I'll do proposal)

2. I don't want a deadline of 6-8 months from
now. A year? Can be done; better, 2 yrs
(possible?)

3. Set right man, postponing submitting proposal
till I was 8-12 months from finishing.

4. MGE now thinks (before tonight) of a
50-50 chance of finishing book

(i.e. 50-50 chance of my getting a deadline;
90% of I do

4-10-09.

Down to 75-80%

I say: 90% chance of my getting a deadline
(within ~~8~~ 3-12 months) and finishing.

He doubts — under-estimates, I say — my commitment
to book.

He bases this on my point now — writing
(this — of my) and procrastination + "doubts about report"
(I did write proposal without pressure from him or RBE
